

Yondr, Everstone to invest over \$1 bn in JV for data centres

RAGHAVENDRA KAMATH
Mumbai, 27 July

The Yondr group, a developer and operator of data centres, on Tuesday said it has formed a strategic joint venture (JV) with Everstone group for data centres. The JV will set aside an initial capital of \$1 billion.

Operating under the brand name EverYondr, the first facility to come up in the Mumbai Metropolitan Region (MMR) — for which land and power have already been acquired — will deliver 30 megawatts (Mw) of IT capacity by 2023. When fully operational, it will deliver 60 Mw. The JV will support hyperscale clients and service the rapidly growing Indian market, the size of which is projected to exceed \$4.5 billion by 2025. The investment will be used to fund the development and operation of multi-locational hyperscale data centres business across in India. Besides MMR, these are likely to include Hyderabad, Bengaluru, Chennai, National Capital Region (NCR) and beyond.

Sameer Sain, co-founder and chief executive officer (CEO) of Everstone group, said: "To meet the accelerated pace of Cloud adoption, hyperscale companies are increasingly looking to credible partners to help realise their expansion needs. Yondr's global experience, combined with Everstone's strong execution capabilities

THE PLAN

- The first facility in MMR will deliver 30 Mw by 2023. When fully operational, it will deliver 60 Mw

- The JV will support hyperscale clients and service the growing Indian market

- The investment will be used to fund the development and operation of multi-locational hyperscale data centres business across geographies in India

- Besides MMR, Hyderabad, Bengaluru, Chennai, and NCR will have these centres

in India, will provide clients with a credible and consistent choice."

Dave Newitt, CEO at Yondr group, said, "Unlike other mature hyperscale markets, data centres in India require a proactive approach to development and a streamlined delivery process. As a business, our mission is to help clients meet their data centre capacity and technical real estate needs, faster and with better performance outcomes than anyone else. Collaborating with a specialised and trusted partner like Everstone will enable us to continue to deliver on that promise in the Indian market that is critically under-served today."

Adani Ports raises \$750 mn overseas via long-term bonds

ADITI DIVEKAR
Mumbai, 27 July

Adani Ports and Special Economic Zone (APSEZ) has raised \$750 million overseas via unsecured bonds.

In an exchange filing, the Gautam Adani-led firm said the coupon rates for the bonds of 20-year and 10.5-year tranche were fixed at 5 per cent and 3.8 per cent, respectively. "The issuance was closed on July 26 and oversubscribed over 3x. APSEZ has continued to receive exceedingly strong partici-

STOCK FALLS 3%

participation (for its successive bond offerings) from its high-quality real money investors across all geographies," said APSEZ. The issuance of bonds increases

APSEZ's debt maturity to over seven years, from six years.

This issuance has reconfigured the ratio of APSEZ's debt from overseas investors from 69 per cent to 73 per cent, said the filing. "The issuance is a part of our capital management programme to lock in lower interest rates over an extended tenor and extend debt maturity," Karan Adani, CEO and whole-time director at APSEZ, said. Shares of APSEZ were trading at ₹663 per share on the BSE, down 3 per cent from the previous close.

Instagram accounts of teens to be private

NEHA ALAWADHI
New Delhi, 27 July

Instagram on Tuesday updated its settings for users under 16 years of age on the platform, defaulting their accounts to a private setting, and less targeted advertising of this younger age group.

The idea, according to Instagram, is to give young people a safer and a private experience. The move follows pushback at the launch of an Instagram service for children under 13.

Instagram is very popular among teenagers, in India and globally. The application, owned by Facebook, has over 1 billion users worldwide. Although it does not break up users by

country, according to Statista, as of April 2021, India was the leading country based on Instagram audience size, with 150 million users accessing the photo-sharing and editing app, followed by the US, with 140 million users.

"We want young people to enjoy using Instagram, while making sure we never compromise on their privacy and safety. We want to strike the right balance of giving young people all the things they love about Instagram, while also keeping them safe. That's why we're announcing changes we're making today (July 27). We'll continue listening to them, their parents, lawmakers,

and experts to build an Instagram that works for young people and is trusted by parents," said Karina Newton, public policy director, Instagram.

Beginning this week, the change will start to roll out. In some countries, the age limit will be less than 18, instead of 16 for default private account settings.

Private accounts let people control who sees or responds to their content. If you have a private account, people have to follow you to see your posts, Stories, and Reels. People also can't comment on your content in those places, and they won't see your content at all in places like the Exp-

lore section, or hashtags.

"Historically, we asked young people to choose between a public account or a private account when they signed up for Instagram, but our research showed they appreciate a more private experience. During testing, eight out of 10 young people accepted the private default settings during sign-up," said Instagram. For those under 16 (or 18) with a public profile on Instagram, it will show them a notification highlighting the benefits of a private account and explain how to change their privacy settings. "We'll still give young people the choice to switch to a public account or keep current account public if they wish," said Instagram.

WhatsApp to let users prioritise important chats

WhatsApp is making it easier for users to stay on the top of their important chats, and to help prioritise other messages that can get in the way. Starting on Tuesday, it is rolling out settings for archived chats which will give users more control over their inbox and more ways to organise archived chats folder. "We came to know users want their archived messages to stay tucked away in the archived folder. The new chats settings mean any message thread that is archived will stay in the archived chats folder," WhatsApp said. **BS REPORTER**
